NON-IRRIGATED

Pure Farm Seeds

Early Maturing

SEED CORN

Our Specialty.

WAREHOUSE OFFICE

26 Custer Ave.,
Billings, Mont.

A. E. CORNELL,
President and Manager.

The Llenroc Seed Co., Inc., is the outcome of 15 years Dry Farming and Experimental Work on the Bench south of Billings; and also a desire to establish a seed centre where the farmers of Southern Montana and vicinity may procure Pure Acclimated Seed Grain and Seed Corn at reasonable prices.

Our first sales were made in 1920 direct from the Farm, then from a small store west of Billings, while now we are pleased to state, we are housed in our own new Warehouse just west of the business center of Billings on Montana Avenue.

Having now ample storage space, and having an electrically operated Carter-Mayhew Disc Cleaner—we are much better equipped than formerly to serve our customers.

We handle only what we grow, standard varieties of Wheat, Barley and Oats, and make a specialty of Early Maturing Seed Corn.

After testing out at Llenroc Farm 212 varieties and strains, we are listing only those which have proved to be the most reliable in our altitude and climate. All mature in 100 days or less.

It costs considerable to grow, clean and grade good seed, but we have priced our stock as low as is consistent with quality.

Asking a continuance of favors from old customers and with the expectation of making many new friends, we are,

Yours for Better Seed,

LLENROC SEED CO., INC.,

A. E. Cornell, Pres. and Mgr.

Wheat, Oats and Barley
